

# Shoulder Support

## 肩托

Model : HA-DR

### Features:

- The specially designed connection between the upper arm and forearm provides strong supporting force, reduces the pulling of the rotator cuff and relieves the shoulder pain. At the same time, the range of motion of the forearm is not limited, patients can wear this shoulder support for rehabilitation training
- It is suitable for: prevention and treatment of shoulder subluxation caused by various reasons (such as: stroke sequelae, peripheral nerve injury, etc).
- 上臂和前臂特殊設計的連接, 提供強大的承托力, 減輕對肩袖的拉扯, 緩解肩部疼痛。同時前臂的活動度不受限制, 患者可以佩戴此肩托進行康復訓練
- 適用於: 預防和治療各種原因導致的肩關節半脫位 (如: 腦卒中後遺症、外周神經損傷等)

### Specifications
